COPIES of Manila papers receiped at the War Department contain a letter, purporting to be from a personal friend of AGUSALDO, which states that the Filipino chief does not take advantage of the amnesty proclamation because some time ago he gave orders to his followers to break up into guerrilla bands. The amnesty norders except those who violated the laws of war, and it states that AGUNALDO fears that he would be in the excepted class should he undertake to surrender under the amnesty proclamation.

The letter states that AGUNALDO never stays more than one night in a place, and only a few hours in anyone locality. He allows no one to come near him except his most intimate personal friends.

THERE is an interesting subsidence of the hue and cry from Democratic sources about "militarism." The phenomenon has been coincidental with BRYAN's long silence about China and final confession that the Administration was doing the right thing there. It "militarism" is right in China, as Mr. BRYAN admits, why is it wrong in the Philippines? Troops in China may avenge crimes that have been committed, but can never restore the lives of people that have been already massacred. In the Philippines the use of American troops has prevented the perpetration of such horrors as in China have shocked the whole world, including even Mr. BRYAN. Manila was prevented from becoming a charnel house only through the vigilance of American troops who were on guard duty the night that AGUINALDO had set for the general massacre of large infance of Americans and Europeans in that dity. How about the old adage that "An ounce of prevention is worth one pound of cure?" THERE is an interesting subsiden-
